Tectonics
Standard Fabrics
The Perfect Fabric Fit

At Tectonics, we believe that our success is contingent on yours. That’s why we use only the highest quality materials in every one of our projects. We’re constantly looking for fabrics that have innovative features and superior performance characteristics. To ensure they meet this standard, we employ an extensive sourcing process including both foreign and domestic mills, as well as a rigorous validation process that includes:

1) Print Quality: All fabrics are tested for crisp, clear prints with precise color matching.
2) Fabric Properties: The opacity, stretch, shrink, cleanability, and durability of each fabric is verified.
3) Construction Methods: Fabrics go through sewing, cutting, and all finishing methods to test performance.
4) Complete System Test: Fabrics are inserted into complete Snap Tube, Extrusion, and when appropriate Lighting Systems to guarantee maximum compatibility.
5) Packaging: We roll, fold, and store fabrics to evaluate for creases and determine optimum packaging procedures.
6) Flame Retardant: Every Tectonics fabric passes NFPA 701 or better.

With Tectonics fabrics, you enjoy the highest quality materials at competitive prices. Plus, every fabric purchase includes a cleaning kit to keep your fabrics spotless.

---

This fabric meets or exceeds the flammability standards set forth in the National Fire Protection Association specification #NFPA-701. Any alteration of the fabric voids any warranty either implied or expressed. The liability of the seller is limited to the selling price as stated on the invoice and related transportation cost.
Avoiding Stains
- Wash your hands before handling any fabric
- Protect your fabric from the floor, use a drop cloth

Removing Stains
- Fresh stains are easier to remove, act quickly
- Use distilled water when attempting to remove a stain
- If cleaners have been used, make sure that all are rinsed clear of the fabric and moisture is blotted away

Fabric Storage
- Fabrics should be clean and dry prior to packaging
- Fabric graphics should be folded with image side in to protect the graphic from any dust or dirt
- Original fabric containers and bags should be saved, it is best to store fabrics in the containers that they were shipped in

01 Use a lint roller to remove any dust or dirt
02 Use provided dry sponge
  - Do this dry!!! Do not use with any water or cleaning products
  - Brush the stain back and forth, then reverse direction
03 Use provided cleaner and wash cloth to spot clean approved fabrics as noted below.
